DTI will not be calculated in the Get Price but may be entered if known. Get Qualified Price calculates DTI, Months Reserves, and Qualifying Income for you. Requirements for Get Qualified Results detailed below.

Get Qualified Price requires five additional data points not typically calculated by traditional PPE's:

1) Income: Gross monthly income that will be considered and documented for qualifying purposes

**2) Property Expenses:** Combined monthly housing expenses for the subject property, including property taxes, insurance, HOA dues, condo fees, minimum subordinate financing payments. DO NOT include proposed first mortgage P&I, LoanNEX is calculating this for all available products and pricing.

**3) Liabilities:** Monthly minimum installment, revolving and other REO mortgage and expenses, net rental expense, child support, maintenance and other recurring monthly obligations.

**4) Reserves:** Gross amount of liquid bank and securities accounts, vested retirement accounts, cash equivalents, etc. Remember to exclude any Borrower funds being used for down payment and settlement costs for the subject property transaction.

**5) Household Size:** Number of people (including dependents) living in the household. This data will be used to calculate residual income, which is frequently a qualifying criterion for certain non-Agency loan programs.
