WHOLESALE EDITION

Market & Rate/Product Trends

Mortgage Market at-a-glance: Rates are moving around but not changing materially; we will continue to be in a predominately 6% rate market for the next couple of years. What does that mean? Refi activity will continue to be opportunistic, but also unpredictable. More participants are engaging in the Non-Agency market from all directions, including investors, lenders, originators, and brokers.

Non-Agency MBS issuances outpaced the market with a 40% quarter over quarter growth rate and a 92% increase year over year. These are growth rates everyone is paying attention to. Even as program options are increasing, so are the nuances and complexities of these programs. Having a presence in Non-Agency is no longer a nice-to-have – it's table stakes.

These are real challenges. Navigating a tight Agency origination market while expanding your toolbox to serve a broader set of borrower needs requires the right support. Our advice: lean on the experts - your partners, your internal team, and LoanNEX - to help you confidently access the full range of opportunities available in today's market.

If your team isn't already exploring these options, now is the time to act. Ensure your team knows how to identify second-lien products within your pricing results—and where to find them on the platform.
